

USING THE BODY PIERCING CD WITH YOUR COMPUTER

Minimum System Requirements:

Windows 98

Pentium II (233 MHz speed)

64 MB RAM

CD-ROM drive

Windows Media Player Version 9

1) If you have an earlier version, you can download

Version 9 free from the Internet at the following site:

www.microsoft.com/windows/windowsmedia/9series/player.aspx

The CD is programmed to load automatically so after you insert the CD into your computer's CD-ROM drive a main menu with purple buttons should appear on your monitor without you having to do anything more.

If you have trouble viewing the items on the CD, call Ed Golding at (850) 245-4277. If this office cannot help you with the problem, we will send you a free copy of the video in VHS format. We probably also can help you view the items on the CD other than the video.
